

EKREM YILMAZ

Software Developer

About

I am Ekrem, a senior student in the 4th year of the software engineering department at Istanbul Aydın University. In addition to my academic studies, I have improved myself through two internships that I completed during my third year. I have focused more on user-side processes, where I feel more confident and comfortable.

Experience

IAU Spor Kültür Daire Başkanlığı - Intern

Çokyaşar Holding - Business Intelligence Intern

I completed 2 internship experiences: 2 months at the IAU Sports and Culture Directorate and 6 months at Çokyaşar Holding. During this time, I developed software on the user side to improve user experience and enhance process efficiency. Collaborating with a project group in a corporate setting also significantly contributed to my growth. For more information about my experiences, you can check out my LinkedIn and GitHub profiles.

Skills

- JavaScript
- TypeScript
- HTML
- CSS
- Java
- NodeJs
- React
- Bootstrap
- Spring Boot
- RPA

Education

İstanbul Aydın University

2020-2025
